

Stable Workflows in pi-agent-minimal-ts

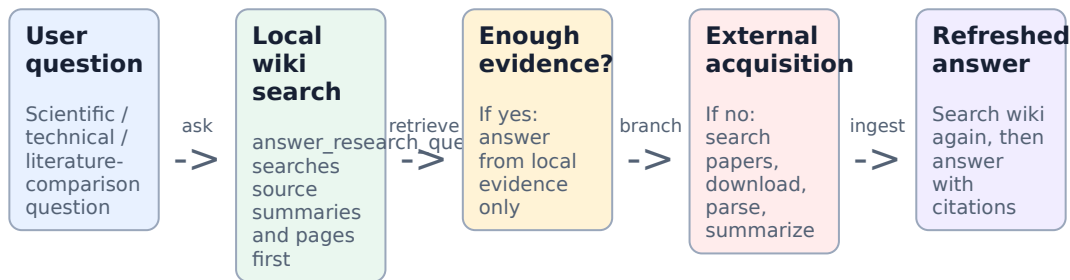

1. Paper acquisition and readable-source closure

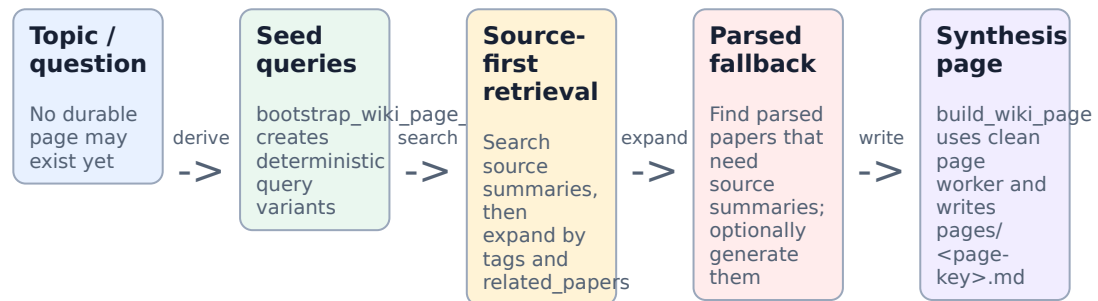

2. Source-summary generation

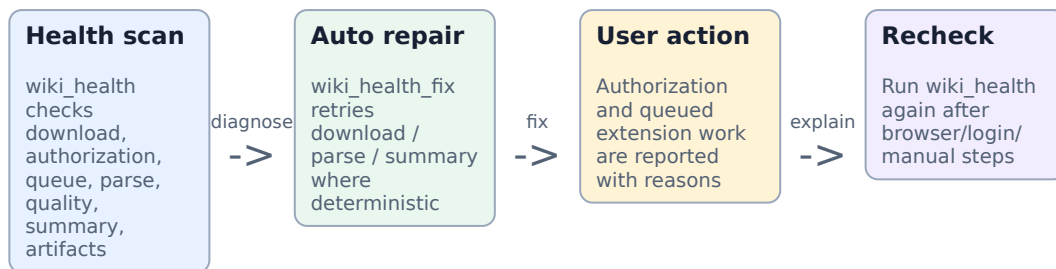

3. Evidence-first professional Q&A

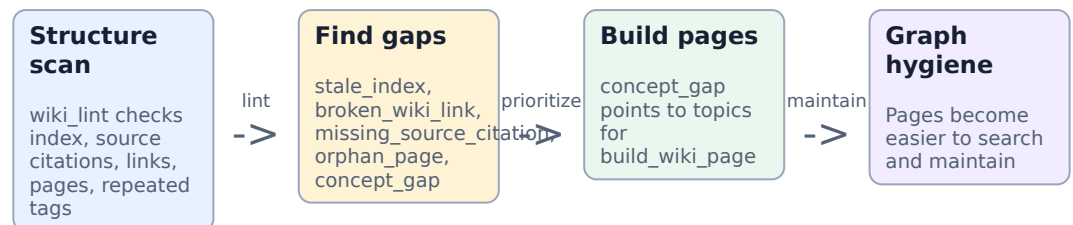

4. New wiki page bootstrap

5. Wiki health and repair

6. Wiki structure lint

Stable core idea: keep raw papers as immutable evidence, promote parsed papers into source summaries, answer from wiki evidence first, and only build durable pages from citeable source summaries.
